

EIOS COVID-19 CASE COUNT DASHBOARD – DISCLAIMER AND TERMS OF USE

The Epidemic Intelligence from Open Sources initiative (EIOS) is a collaborative effort across public health organisations to facilitate the early detection of and response to potential health threats using open sources from publicly available information. You can read more information about EIOS [here](#).

This dashboard, hereafter referred to as the "EIOS COVID-19 Case Count Dashboard", shows various COVID-19 counts as reported by the [World Health Organization \(WHO\)](#), [Johns Hopkins CSSE Data Repository](#), [WorldoMeter](#) and the [European Centre for Disease Prevention and Control](#).

The dashboard is updated every 5 minutes based on the latest published data from these sources. Content displayed on the EIOS COVID-19 Case Count Dashboard other than that from the WHO is from openly available sources and has neither been reviewed nor confirmed by the WHO or the organisations participating in EIOS. Users are therefore cautioned to be careful when comparing and interpreting the content on the EIOS COVID-19 Case Count Dashboard as it will likely contain discrepancies across counts. Any statements, findings, conclusions, views and opinions contained and expressed herein are not necessarily those of the data sources. The WHO only updates its reported counts once they have been reviewed, assessed and confirmed/verified by the implicated Member State. This can result in reporting delays.

The EIOS COVID-19 Case Count Dashboard is not a comprehensive representation of all of the content that the WHO and the EIOS community are aware of and assessing and is for general information only. It is subject to change without notice. The WHO and the EIOS community make no claims, promises or guarantees about the effectiveness, completeness and accuracy of the contents displayed, do not in any way endorse the sources of information appearing on the EIOS COVID-19 Case Count Dashboard, and expressly disclaim any liability for damages as a result of the use and/or application of this dashboard, including as a result of errors and/or omissions in the content. The responsibility for the interpretation and use of the content lies with the reader. The WHO reserves the right to make updates and changes to posted content without notice and accepts no liability for any errors or omissions in this regard.

The WHO and the EIOS community assume no responsibility or liability for any consequence resulting directly or indirectly from any action or inaction readers take based on or made in reliance on the information and material available on the EIOS COVID-19 Case Count Dashboard. While every reasonable effort has been made to use appropriate language and representations on the EIOS COVID-19 Case Count Dashboard, the WHO and the EIOS community expressly disclaim any responsibility for inadvertent offensive or insensitive, perceived or actual, language or content. The WHO and the EIOS community will take no responsibility for or be liable for the EIOS COVID-19 Case Count Dashboard being temporarily unavailable in the event of technical or other issues.

The designations employed and the presentation of content on the EIOS COVID-19 Case Count Dashboard, including counts, location names and other content, do not imply the expression of any opinion whatsoever on the part of the WHO or the EIOS community concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delineation of frontiers and borders.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.
